ABDULLAH M. SHEHADA

COMPUTER ENGINEER | SOFTWARE, AI AND DATA SYSTEMS

Khan Younis, Gaza Strip | +970 594 798 828 | AbdullahShehada03@gmail.com

SUMMARY

Computer Engineering graduate with Excellence (GPA 90.7%) and multidisciplinary experience in software engineering, AI systems, data management, academic support, and humanitarian operations. Hands-on work with Python, Java, JavaScript, PHP/Laravel, FastAPI, Node.js, React, Next.js, PostgreSQL, MongoDB, REST APIs, JWT authentication, and RAG. Built data-driven web platforms, AI-enabled education systems, and beneficiary-management solutions, and supported students as a Data Structures Teaching Assistant. Brings strong problem solving, documentation, teamwork, leadership, accuracy, and the ability to deliver under pressure.

SKILLS

Programming and Backend: Python, Java, JavaScript, PHP, Laravel, FastAPI, Node.js, Express
Frontend: React, Next.js, HTML, CSS, Bootstrap, responsive interfaces
Databases and Data: PostgreSQL, MongoDB Atlas, SQL, relational design, CRUD workflows, migrations, data validation
AI and Machine Learning: RAG, embeddings, AI system integration, PyCaret, Computer Vision, CNN, Deep Learning, data preprocessing
APIs and Security: REST APIs, JWT authentication, webhook integrations, role-based permissions
Engineering Tools: Git/GitHub, Linux/UNIX, Windows, VirtualBox, troubleshooting, technical documentation
Data and Operations: Microsoft Excel, Google Sheets, Google Forms, reporting, beneficiary records, team coordination

PROJECTS

EduFusion AI | Integrated Education Platform and Graduation Project
PostgreSQL | Node.js | Express | FastAPI | React | Next.js | JWT | RAG
- Designed a PostgreSQL schema and secure REST APIs with authentication flows and reporting dashboards.
- Developed EduPredict for student-risk predictions and integrated a RAG chatbot, quiz generation, and lecture transcription in one platform.

AI Academic Chatbot | Islamic University of Gaza
Python | FastAPI | MongoDB Atlas | RAG | Embeddings | WhatsApp Cloud API
- Developed a RAG-based academic assistant for university information, uploaded-file conversations, and authenticated student queries.
- Integrated semantic caching, secure user-specific data handling, and WhatsApp webhook processing to improve accessibility and reduce repeated AI calls.

Emergency Orphan and Family Beneficiary Management System
PHP | Laravel | PostgreSQL | SQL | Bootstrap
- Designed a normalized relational database for families, orphans, beneficiaries, guardians, and aid-distribution records with validated CRUD workflows.
- Implemented role-based permissions, advanced filters, searchable reports, CSV exports, dashboard statistics, audit logging, and database migrations.

Smart Restaurant Management System | Role-Based Ordering
React | JavaScript
- Built role-based interfaces for customers, chefs, waiters, and administrators, with real-time order tracking and a kitchen display.

EXPERIENCE

Teaching Assistant, Data Structures | Islamic University of Gaza
Fall 2026

- Support Data Structures instruction in Java by explaining core concepts, guiding programming exercises, and helping students strengthen problem-solving skills.
- Prepare practical review labs and examples that connect data-structure concepts with real programming use cases.

AI Systems Developer | Islamic University of Gaza
7 months

- Developed and supported Python-based AI systems, working with structured data, system workflows, APIs, and technical documentation.
- Investigated technical issues and applied analytical problem solving to improve reliability and support continuous development.

Field Operations and Humanitarian Support | Reach Foundation
Gaza Strip | 2024 - 2026

- Maintained beneficiary, distribution, quantity, and field-activity records to support accountable humanitarian delivery and reporting.
- Supervised field teams, coordinated beneficiaries and logistics, verified quantities and handovers, and resolved operational issues under rapidly changing conditions.

Data Entry and Application Evaluation | Reach Foundation
Gaza Strip | 2023 - 2025

- Entered, organized, audited, and verified student and beneficiary data using Microsoft Excel, Google Sheets, and Google Forms.
- Evaluated scholarship applications, verified financial and supporting data, and assisted with applicant interviews and selection activities.

Community Kitchen Supervisor | Reach Foundation and WCK
March 2025 | Ramadan

- Supervised daily kitchen operations, tracked incoming supplies and outgoing meals, maintained written records, and monitored distribution to displaced people.

EDUCATION

Bachelor's Degree in Computer Engineering | Islamic University of Gaza
Graduated with Excellence | GPA 90.7%

TRAINING AND COURSES

- **Software Engineering Training | Masar Program | 300 hours over 6 months:** Software engineering fundamentals, practical programming, teamwork, and project-based delivery.
- **Minimum Viable Product (MVP) | Masar and Sanabel:** Idea validation, user needs, feature prioritization, and MVP planning.
- **Java and Databases | Islamic University of Gaza:** Object-oriented programming, database fundamentals, and structured data concepts.
- **Python | Udemy:** Practical Python programming fundamentals and problem solving.
- **English Language and Civic Engagement Exchange Program:** English communication and civic engagement activities.
